

Technical Data Sheet  
**SYSTEM CLEANER**  
CIRCULATION SYSTEM CLEANER

Application advice for best performance :

- Add System Cleaner to each circulator, diluting it with water in a ratio of 1:5 to 1:10 depending on the cleaning requirement.
- Circulate for 2-3 hours and drain.
- Then flush through with clean water several times (at least 3 times) to clear the system completely.
- It can be used by diluting with water at a ratio of 1:5 for cleaning for 3-4 months and diluting at a ratio of 1:10 for weekly cleaning.
- Keep turbo and spray bars closed in coldset systems.
- Check filters to prevent clogging.

•

Key Features:

- Effectively removes ink, paper residues, dirt, lime and all residues from water systems.
- Destroys calcium residues in the system.
- Can be used in sheet offset, heat-set and coldset printing machines.
- Has effective cleaning power.
- Can be diluted with water from 1:5 to 1:10 depending on the required cleaning
- Economical in terms of usage.
