

UVICLEAN 80

Wash agent for Flexo inks

An efficient wash agent for cleaning flexo plates and anilox rollers, printing with solvent based and UV based inks. Uviclean 80 provides a very good ink solvency

Properties

- Not harmful
- Valid for both manual and automatic wash
- Its slow evaporation and high flash point (75 °C) brings down the fire risks in the printroom. It also offers a low odour advantage.
- Miscible with water
- Uviclean 80 has a studied anti-corrosion protection.
- Compatible with materials used in UV printing.
- Uviclean 80 does not attack flexo plates.

User Instructions

Apply **Beca Ink C** on the plates surface, either with a sponge or with a spray (for fresh inks it can be pre-mixed with water up to 25%). Leave it to act for a few seconds and rinse it off with water.

Automatic Wash: Follow the automatic washing system manufacturer's operating instructions.
